

Content

Induced transition moments in rare-earth compounds <i>E. Burzo</i>	1
The use of ac susceptibility measurements in the investigation of relaxation and resonance in magnetic fluids <i>P. C. Fannin</i>	11
Carbon encapsulated iron nanoparticles prepared by laser pyrolysis: characterization and catalyzers for carbon nanotubes and nanofibers <i>F. Dumitrache, V. Ciupina, I. Morjan, R. Alexandrescu, I. Voicu, I. Soare, L. Albu, R.E. Morjan, G. Prodan</i>	23
General approach of the monitoring systems for central receiver plants (CRP) and PV plants (PVP) <i>L. Fara, Antonio Valverde Canton, S. Fara, D. Finta</i>	33
Dynamic localization produced by time dependent electric fields revisited <i>C. Micu, E. Papp</i>	42
Determination of the anisotropy constant of nano – particles by means of magnetic resonance measurements <i>I. Malaescu, P. C. Fannin, C. N. Marin</i>	51
Magnetic behaviour of homogeneous Θ-NiMn compound <i>I. Cosma</i>	57
Entropy and laws of psychophysical processes <i>I. Cosma, A. Cosma, Andreea Cosma</i>	61
Thomas Young and some peculiarities of the rainbow <i>Florea S. Uliu</i>	68
Non-steady thermosolutal convection in a vertical composite fluid – porous cavity <i>A. Neculae</i>	78
The evaluation of the T=0K order parameters of MgB₂ in a weak coupling approximation of the Eliashberg equations <i>E. V. Macocian</i>	84
Determination of amino acids in blood samples by GC/MS <i>Monica Culea, Adriana Bucur, Onuc Cozar</i>	89
Study of amino acid transmembranar transport <i>Monica Culea, Lorena Petrusca, Monica Iosin, Onuc Cozar, Ilioara Coroiu</i>	93
Optical characterization of amorphous antimony trisulfide thin filmS based only their transmission spectra <i>N. Tigau, G. Murariu</i>	99

Gas bubbles nucleation during shaped sapphire single crystal growth O. Bunoiu, Irina Nicoara, T. Duffar	103
About the electric's polarization in crystals from the KDP class <i>Daniela Dolha</i>	107
Spectroscopic studies of electrolytical colored shaped CaF₂ and BaF₂ crystals <i>Liliana Lighezan, Irina Nicoara, P. Negrea</i>	111
The dielectric spectrum of Erbium doped calcium fluoride crystals <i>M. Munteanu, N. Pecingina – Girjoaba, M. Stef, I. Nicoara</i>	115
The shift operators of (d+1) -dimensional relativistic Pöschl-Teller oscillators <i>Nicolina Pop</i>	119
Klein - Gordon field equation <i>G. Murariu, C. Dariescu, Marina Aura Dariescu</i>	123
On the Simulations Physics Laboratory <i>G. Murariu, N. Țigău</i>	127
Biological effects of magnetic fluids and static magnetic fields in cereals <i>M. Răcuciu, D. E. Creangă, Gh. Călugăru</i>	131
Fine magnetic nanoparticles embedded in a silica matrix obtained by a new chemical route of synthesis <i>C. Caizer, M. Stefanescu, M. Stoia, P. Barvinschi, O. Stefanescu</i>	135
Ferofluid influence on LHC II system in some forestry species <i>I. Creangă, Gh. Călugăru, G. Matei, Dorina Creangă, Răcuciu Mihaela</i>	139
Contributions to the obtaining and the characterization of some magnetic liquids <i>I. Malaescu, L. Gabor, C. N. Marin, N. Stefu</i>	143
The effect of dipolar interactions on the magnetization reversal of individual grains in perpendicular recording media <i>C. N. Marin, N. Stefu</i>	148
Pattern formation in electrocrystallization: an overview <i>P. Barvinschi</i>	153
Simulation of the thermal field due to ohmic heating in thin layer electrodeposition <i>P. Barvinschi</i>	157
About an analogy between electrochemical deposition and solidification of a pure liquid <i>P. Barvinschi</i>	163

Isotopic enrichment measurements in uniformly labelled cholesterol with ^{13}C by GC/MS,	169
<i>Monica Culea, Oana Doina Gainar, Monica Sigovan, Onuc Cozar</i>	
On the reliability of stand – alone PV systems	173
<i>M. Paulescu, E. Tulcan-Paulescu</i>	
A mathematical model for total solar irradiation on tilted surfaces	177
<i>M. Paulescu, E. Tulcan-Paulescu</i>	
Synergistic effects of radiations and drugs	181
<i>E. Cirstea, M. Radu, D. Martin, M. Moiescu, T. Savopol, E. Kovacs, I. Margaritescu, N. Iacob</i>	
Food microbiological safety obtained by combined electron beam and microwave irradiation	186
<i>G. Craciun, D. Martin, E. Cirstea, N. Belc, V. Gagi, D. Ighigeanu, V. Ionescu, N. Iacob</i>	
The effect of accelerated electron beam on human blood plasma	193
<i>D. Ighigeanu, D. Stan, D. Martin, I. Baciu, E. Cirstea, E. Oprea, G. Craciun, I. Margaritescu, N. Iacob</i>	
Microwave exposure systems for bioelectromagnetic experiments	200
<i>D. Martin, E. Manaila, C. Matei, T. Savopol, D. Ighigeanu, E. Kovacs, M. Radu, I. Margaritescu, M. Moiescu, G. Craciun, N. Iacob</i>	
Microwave and accelerated electron beam irradiation facilities for biotechnologies	207
<i>D. Martin, D. Ighigeanu, C. Matei, E. Cirstea, G. Carciun, N. Iacob</i>	
Comparison between statistical facts in an artificial stock market and real data in BVB stock market	214
<i>Dorina Andru Vangheli</i>	
About the possibility for using of the statistical stock market models with interacting agents for understanding of financial market dynamics	218
<i>Dorina Andru Vangheli</i>	
Inductively coupled plasma – atomic emission spectrometry used in environmental analysis	222
<i>Mariana Dobra, V. Viman</i>	
Plasma and ultrasonic nano/micro-particles generator	227
<i>Ioan Bica, Gheorghe Catana</i>	
The essential criander oil	233
<i>I. Andrei, Oana Andrei, Dorina Modra</i>	
Gaseous markers determination in biology with photo acoustic laser spectroscopy method	239
<i>G.J.Ciuciu, D.C. Dumitras, D. Nicolae, C. Talianu</i>	

Characterization of the electrical properties of solution – grown GaN crystals by reflectivity measurements	245
<i>C. Salcianu, B. Birkmann, E. Meißner, S. Hussy, J. Friedrich, G. Müller</i>	
Computer simulated EPR spectra of Cu²⁺ ions in multicomponent glasses	249
<i>Lavinia Cociu, P. Blaga</i>	
Shift operators of the (d+1)-dimensional relativistic rotating oscillators	253
<i>Nicolina Pop</i>	
Studying thermodynamic properties of relativistic fermion oscillators	262
<i>Nicolina Pop</i>
