

Content

Advanced magnetic materials for technical applications <i>E. Burzo</i>	1
Investigating the properties of magnetic fluids by means of polarized measurements <i>P.C.Fannin</i>	14
Non – canonical operators and Gauge fixing procedure <i>Radu Constantinescu, Carmen Ionescu</i>	24
Reducible second – class constraints <i>C. Bizdadea, E. M. Cioroianu, S. O. Saliu, S. C. Săraru</i>	34
No-Go couplings between an irreducible spin–one field and a massless Q-gravitino <i>C. Bizdadea, E. M. Cioroianu, E. Diaconu and S. C. Sararu</i>	43
Interactions between a massless tensor field with the mixed symmetry (2,2) and a two-form Gauge field <i>C. Bizdadea, C. C. Ciobirca, I. Negru, S. O. Saliu</i>	50
The derivation of the Dirac bracket for Gauge-fixed three and two forms with Stueckelberg coupling <i>O. Balus, C. Bizdadea, E. M. Cioroianu, S. C. Sararu</i>	58
Electronic band structure engineering of synthetic semiconductors <i>Ion Cotaescu, Marius Paulescu, Paul Gravila</i>	68
Relativistic version of the transfer matrix method <i>Ion Cotaescu, Paul Gravila, Marius Paulescu</i>	72
Quantum LC – circuits with a time dependent external source <i>C. Micu, E. Papp, D. Racolta</i>	79
Bel-Robinson energy tensors in Bianchi type I spacetime <i>Victor Rikhvitsky, Bijan Saha, Mihai Visinescu</i>	87
Numerical simulations in Ricci flow with the Cactus code <i>Dumitru N. Vulcanov</i>	95
Symmetries for a fourth order differential equation <i>Afrodita-Liliana Boldea, Costin-Radu Boldea</i>	100
Mathematical modeling of non-necrotic tumor growth. One component spherically simetric model <i>D. Grecu, A. S. Carstea, A. T. Grecu, Anca Visinescu</i>	108

The production and characterization of some medically used radioisotopes	118
<i>Laura Daraban, O. Cozar, T. Fiat, L. Daraban</i>	
VOCs pollutants determination by GC-MS	125
<i>Monica Culea, O. Cozar</i>	
Use of biomarkers in diagnosis by isotopic dilution and gas chromatography – mass spectrometry	135
<i>Monica Culea, Mesaros Cornelia</i>	
Theoretical and experimental modeling and study of compressional wave motion in periodical structures	142
<i>Ioan Cosma, Diana I. Popescu</i>	
Brakes and clutches with smart fluids	151
<i>Alexandru Boltosi, Adrian Chiriac, Ramona Nagy</i>	
The resemblances between finite and infinite formulation of Hofstadter spectrum	157
<i>Ovidiu Borchin</i>	
Dynamical properties of metal clusters	165
<i>C. Lupulescu, L. D. Socaciu-Siebert, E. C. Stanca-Kaposta, A. Merli, L. Wöste</i>	
Thin films deposited by thermoionic vacuum arc method	178
<i>V. Ciupina, R. Vladoiu, C. P. Lungu, I. Mustata, G. Prodan, V. Bursikova, G. Musa</i>	
The influence of the branched electrodeposit morphology on the transport phenomena during thin-layer electrochemical deposition (ECD)	187
<i>Adrian Neculae, Paul Barvinschi</i>	
Magneto-rheological fluid (MRF) and electro-rheological fluid (ERF) device modeling	191
<i>Ramona Nagy, Adrian Chiriac, Alexandru Boltosi</i>	
The copper radioisotopes production of medical interest	198
<i>Laura Daraban, O. Cozar, T. Fiat, L. Daraban</i>	
Structural properties of Bi₂O₃ - PbO glasses doped with rare earth ions	204
<i>L. Pop, E. Culea, M. Culea, S. Rada, P. Pascuta, R. Fechete, M. Bosca, R. Chelcea</i>	
The heavy metals influence on germination and growth processes at <i>PISUM SATIVUM</i> L.	208
<i>Daniela Giosanu, Monica Fleancu</i>	
Temperature distribution in Bridgman equipment used to obtain calcium fluoride single crystals	212
<i>O. Bunoiu, B. Faina, C. Biris, D. Vizman, I. Nicoara</i>
