<b>Models in Magnetism: Introduction</b> <i>E. Burzo</i>	<b>1</b>
<b>Why we like magnetism - Why we need models - Qualitative description of models and types of magnetism</b> <i>P. F. de Châtel</i>	<b>7</b>
<b>Basic Concepts</b> <i>J. M.D. Coey</i>	<b>12</b>
<b>Magnetism of free electrons</b> <i>J. M.D. Coey</i>	<b>22</b>
<b>Exchange interactions: super-exchange, double exchange, RKKY; magnetic orders</b> <i>Tomasz Dietl</i>	<b>24</b>
<b>Electronic structures: tight binding, LDA, DFMT</b> <i>Manuel Richter</i>	<b>30</b>
<b>Magnetic Order: different types, dimensionality effects, number of components (Ising, XY, Heisenberg)</b> <i>P. F. de Châtel</i>	<b>34</b>
<b>Single-ion anisotropy, pair anisotropy, Magnetoelasticity</b> <i>Dirk Sander</i>	<b>37</b>
<b>Magnetoelectricity and multiferroics</b> <i>Charles Simon</i>	<b>40</b>
<b>Mean field approximation - Phase transitions</b> <i>Michael D. Kuzmin</i>	<b>46</b>
<b>Landau's Theory of second-order Phase Transitions as applied to Ferromagnets</b> <i>Michael D. Kuzmin</i>	<b>50</b>
<b>Spin waves (including dimensionality effects)</b> <i>W. Wulfhekel</i>	<b>54</b>
<b>Monte Carlo Simulations</b> <i>Zoltán Néda</i>	<b>57</b>
<b>Review of typical behaviours observed in strongly correlated systems</b> <i>Charles Simon</i>	<b>65</b>
<b>Magnetic instability. Magnetic impurity in metals</b> <i>Mireille Lavagna</i>	<b>71</b>

<b>Metal-insulator transition - Magnetism and superconductivity</b>	<b>72</b>
<i>Jozef Spałek</i>	
<b>Models in spintronics: Drude, Mott, Giant Magnetoresistance and Valet-Fert, spin transfer and torque</b>	<b>77</b>
<i>B. Dieny</i>	
<b>Transport in magnetic semiconductors and oxides</b>	<b>85</b>
<i>Tomasz Dietl</i>	
<b>Domains and walls, magnetization processes, coercivity processes, analysis of hysteresis</b>	<b>87</b>
<i>Olivier Fruchart</i>	
<b>Preisach model, First – order Reversal Curves</b>	<b>94</b>
<i>Alexandru Stancu</i>	
<b>Thermal activation, magnetization dynamics, dissipation, Numerical modelling</b>	<b>100</b>
<i>O.Chubykalo-Fesenko</i>	
<b>Tutorial on the micromagnetic modeling</b>	<b>107</b>
<i>O. Chubykalo-Fesenko</i>	
<b>Inhomogeneities in magnetic systems</b>	<b>112</b>
<i>Alberta Bonanni</i>	
<b>Low Dimensional Magnetism</b>	<b>115</b>
<i>Pietro Gambardella</i>	
<b>Spintronic devices for memory and logic applications.</b>	<b>117</b>
<i>B. Dieny, R. Sousa, G. Prenat</i>
