

## Content

<b>Lagrangian BRST cohomology of massless mixed symmetry tensor fields. The case (4,1)</b>	<b>1</b>
<i>C. Bizdadea, S. O. Saliu, L. Stanciu-Oprean</i>	
<b>Bosons generation in strong electric fields via WKB formalism</b>	<b>6</b>
<i>Marina-Aura Dariescu, Ciprian Dariescu, Ovidiu Buhucianu</i>	
<b>Absorption of Sound Waves</b>	<b>13</b>
<i>Vjekoslav Sajfert, Sonja Krstić, Dušan Popov, Nicolina Pop</i>	
<b>A second – order approach to first – order systems: quadratic actions</b>	<b>20</b>
<i>C. Bizdadea, M. M. Bârcan, I. Negru, S. O. Saliu</i>	
<b>About the diffusion in magnetic stochastic turbulence</b>	<b>25</b>
<i>M. Negrea, V. N. Cancea, I. Tanase</i>	
<b>Aharonov – Bohm oscillations in concentric quantum ring systems</b>	<b>30</b>
<i>Zs. Szakacs, D. Racolta</i>	
<b>Conductive and superconductive properties of nanorods</b>	<b>37</b>
<i>Vjekoslav Sajfert, Dušan Popov, Miroljub Đurić, Nicolina Pop, Viorel Chirițoiu</i>	
<b>Numerical modeling of granular media with deformable composite particles</b>	<b>45</b>
<i>Bogdan Barvinschi, Paul Barvinschi</i>	
<b>1D and 2D time series Fourier correlations of Drăgan dam horizontal displacements</b>	<b>53</b>
<i>Alin C. Teusdea, Traian Modog</i>	
<b>The EPR spectra for cooper ions in mixed alkali cadmium phosphate glasses</b>	<b>60</b>
<i>M. G. Ciresan, C. N. Avram</i>	
<b>Simulation of platelet deposition and activation using an extended Sorensen model</b>	<b>63</b>
<i>Alice Ivan Fernolendt, Adrian Neculae</i>	
<b>Pattern recognition of amphetamines FT-IR spectra with modified phase – input Fourier correlation</b>	<b>70</b>
<i>Alin C. Teusdea, Mirela Praisler</i>	
<b>Spectroscopic studies of copper (II) complexes with some amino acid as ligand</b>	<b>77</b>
<i>Maria Hübner, I. Hauer, Csilla Muller, D. Rusu, Klara Botond, L. David</i>	
<b>Energy levels scheme for CrF<sub>2</sub></b>	<b>86</b>
<i>Simona Ivascu, C. N. Avram</i>	

<b>Characterization of annular array transducer</b>	<b>92</b>
<i>Luminita Moraru, Laura Onose, Ana-Maria Chiselev</i>	
<b>The use of cie L*a*b* colour space for automatic pork meat content analysis</b>	<b>99</b>
<i>Alin C. Teuşdea, Adrian Timar, Olimpia S. Mintaş, Lucian Bara</i>	
<b>Analytical approach for planary dynamics in orthogonal magneto – electrostatic fields</b>	<b>105</b>
<i>Gabriel Murariu, Lucian Georgescu, Mirela Voiculescu, Gheorghe Puscasu</i>	
<b>Numerical simulation of mass diffusion in brain tissues</b>	<b>111</b>
<i>Adrian Neculae, Dan Curticapean</i>	
<b>Comparative study between crystal field parameters for Mn<sup>4+</sup>:K<sub>2</sub>SiF<sub>6</sub> and Mn<sup>4+</sup>:Na<sub>2</sub>SiF<sub>6</sub></b>	<b>118</b>
<i>Ramona Nistora, N. M. Avram</i>	
<b>Analysis of a nonlinear anelastic model and its experimental identification</b>	<b>123</b>
<i>Dan Viorel Stănescu, Gheorghe Drăgănescu, Liviu Bereteu</i>	
<b>The use of cie L*a*b* colour space for smoked fish meat content assessment</b>	<b>130</b>
<i>Adrian Timar, Alin C. Teusdea, Camelia Bara, Cornelia Purcareea</i>	
<b>Stable isotopes distribution in the Olt Valley Rivers</b>	<b>137</b>
<i>Popescu Raluca, Costinel Diana, Ionete Roxana Elena, Axente Damian</i>	
<b>Dusty plasmas: elementary processes, examples and possible applications</b>	<b>144</b>
<i>Mihai Lungu, Antoanetta - Corina Lungu</i>	
<b>Parametric analysis of the radial segregation in directional solidification of alloys</b>	<b>153</b>
<i>M. Robescu, R. Nistora, C. Stelian</i>
